## Web Development Projects

### Flippers Tavern

A single page React website that allow users to browse the taverns amenities. Currently in development – will be implementing Contetful so the client will be able to update the websites content as needed.

### eargASMR

An IOS phone app that allows the user to pick an assortment of sounds that will help create a state of relaxation. Working with UX designers their insight helped bring the app to fruition. React-Native and React-Native-Sound

### PupFetchr

A website that allows users to browse dog shelters for adoption. Pulling data from the Petfinder API users simply enter a zipcode and a list of dogs will be returned with information in the area entered. Express, Mongoose, Jquery
